

Beavers

My Favorite Wildlife

By Rebecca Davison (age 10)

My favorite wild life is the beaver. Beavers are being hunted in Charlton because hunters are mad at the beavers. They are trapping them for flooding the rivers. That just makes me very mad, because beavers are just living their lives and doing what they do.

I love beavers, they look so cute! They are strong and smart animals. They build their homes with logs, wood, tree branches, twigs and mud. When I see them in Buffumville, they look so happy there. What nice animals!

Beavers have these wide, flat tails and small, round, brown bodies. Their two front teeth are very big to chew through wood. It helps them a lot to make their homes. They have small hard to see feet; long, fine whiskers and look very fuzzy. That is why beavers are my favorite wild life.
